

Technical Expertise. Tangible Results.

## OFFERING BRIEF » DDI SOLUTIONS

PCN is a global leader in DDI solutions. Our subject matter experts couple innovative technical expertise with solutions that are customized to fit your internal process. We deliver proven offerings that fit your specific business requirements and accommodate both legacy and new environments.

Could your organization benefit by engaging PCN to support your DDI services and infrastructure? Ask yourself a few critical qualifying questions: How much are DDI outages costing? What is your DDI disaster recovery plan?

Have you validated that your DNS Infrastructure is currently secure and staying secure? Does your DDI architecture provide the proper control and support for your virtualization, cloud and mobility initiatives? If you don't know or don't like the answers to these questions, then you might benefit from a consultation with one of our DDI experts. Your mission critical networks and applications need the protection that a modern, centralized DDI solution brings to ensure that threats and outages don't cost you revenue, reputation, and customer loyalty.

PCN has global management experience designing, delivering, and supporting DDI solutions using purpose-built appliances from all major DDI OEMs. We have the experience and savvy necessary to manage the complexities and threats that can exist within diverse technologies and heterogeneous operating environments. Some of the world's largest brand name companies entrust us with their foundational IP services. We ensure that the IP services that are underpinning our customers' systems, networks, applications and connectivity are safe, secure, and optimally managed to enable their business success.

Technical Expertise. Tangible Results.

CONNECT with us

## PCN SPECIALIZES IN

- The management, upgrading and transformation of complex legacy systems
- Rationalizing overlapping address space
- Supporting the DDI implications of mergers and acquisitions
- Managing disjointed multi-vendor DDI infrastructures
- Multi country deployments and transformations
- IPv4 to IPv6 transition
- Implement manufacturer upgrades
- Break/fix capabilities

Constantly evolving network and technology requirements create complicated infrastructures so organizations are increasingly finding the need for, and value of, working with specialized partners. Domain expertise is essential to navigating and managing technology challenges, ensuring you have the most innovative DDI technology, while mitigating risk. We architect solutions that maximize the value of your infrastructure investments, whether that is a complete lifecycle solution, a systems upgrade, or help resolving a complex problem. PCN has over 26 years of expertise and strong delivery qualifications to empower your business.
