

Technical Expertise. Tangible Results.

COMPANY OVERVIEW

PCN is a customer focused technology infrastructure services company. We help our partners and customers succeed in the rapidly changing “network of everything” world they compete in by providing full life cycle services for their dynamic, mission critical technology environments.

PCN also brings deep domain expertise and operating know-how to our core services portfolio which includes: Managed Services, Project Management, Systems Integration, End User Enablement/Service Desk, Managed Logistics, Consulting, Staffing and the value added resale of strategic infrastructure products.

» DDI SOLUTIONS

We are a global leader in DNS, DHCP, and IP Address Management. This service, known collectively as DDI, is foundational to network management and is becoming an essential tool for managing the explosive growth of fixed, mobile and wireless IP-enabled devices and to defend against the DNS & DHCP attacks both from the Web and from within the enterprise.

Our DDI expertise, global reach, and organizational agility make us the chosen partner of leading service providers (like Verizon) and system integrators (like IBM). Our innovative and cost effective solutions are also compelling to direct enterprise buyers (like TD Bank), government entities, and mid-size companies challenged to do more with less.

Our Managed DDI Services provide:

- Managed Take-Over (MTO) of Current DDI Environment
- Provision and Implementation (Transition, Managed Take-Over, Transformation)
- Network Operations Center Support (Tier I/Tier II/Tier III)
- Project Support
- Migration and Transformation to and from any DDI OEM platform
- MACDs (Moves, Adds, Changes, Deletes)
- Configuration Management
- Performance Management and Reporting
- Security Management
- Flexible Financial Models - Operational Expenditure and Capital Expenditure sourcing of new DDI Infrastructure
- Asset Management
- Service Level Agreement and Service Level Objective backed service performance
- Managed Logistics

Technical Expertise. Tangible Results.

» STAFFING SERVICES

PCN's IT infrastructure expertise means we know what to look for to find the personnel who can integrate with a new or continuing project or team and provide support for your critical initiatives without missing a beat. We can help you source long and short-term project resources, as well as contract-to-hire and permanent placement. We provide both cleared and non-cleared technical resources to deliver the services you need within your operational and budgetary requirements.

We can help you manage your technical staffing needs in a variety of situations, including:

- IT Infrastructure, PMO Standup, IT PM and Business Analysts, DDI (DNS, DHCP and IPAM), Technology Refresh Projects, Software Development and QA
- Microsoft Project Server Standup, Maintenance, and Upgrade
- Network Administration
- ITIL Service Desk Standup and Support
- Managed Services
- Projects for Federal Agencies requiring resources with security clearance

PCN does more than provide technology and services; we strive to be a strategic partner offering complete technology lifecycle solutions. We differentiate ourselves with our unwavering personal commitment to service and our passion for excellence to successfully deliver the technology and services you need to meet your business objectives. There are so many choices when undertaking a technology project. But, whether you are embarking on an IPv4 to IPv6 migration, assessing, securing, or transforming your DDI infrastructure, or launching a new technology initiative, you need to ensure you have the right partner in place to handle the job.

PCN integrates innovative technology and custom solutions into daily operations to:

- Access world-class capabilities and domain expertise and capacity
- Improve productivity with best practices
- Boost efficiency through operating know how
- Control and reduce operating costs
- Improve customer focus
- Free up internal resources to focus on core competencies
- Accelerate migration to new technology
- Identify and help mitigate risk
- Utilize specialized talent resources
- Flexible contract and pricing models
