## FAQs

### Why implement GRC?

As cyber threats increase and compliance mandates get more complicated, a well-designed cybersecurity program can help you do what your business and customers are relying and requiring you to get done.

### How do we get started?

PCN's GRC Security Services assists organizations in the development of scalable programs to improve their cybersecurity posture according to business objectives. Utilizing a risk-based approach, PCN provides customized assessment of an organization's cybersecurity practices, creating a cyber risk profile. PCN provides advisory of information assurance services to ensure a security posture to defend against cybersecurity threats.

## About Us

As True Partners in Change, PCN's mission is to bring agility and risk mitigation to organizations reshaping their worlds through digital transformation. ISO27001 and WBENC certified.
